 Steritech's Gamma Services provides gamma irradiation treatment to eliminate quarantine risks in pet products. Alternative treatment methods are not as effective as gamma irradiation in eliminating risks such as E-Coli and Salmonella. The gamma process can assist in opening pathways to countries where import conditions require a specific set of treatments. Globally, the process is well recognised. Product is treated quickly, as opposed to longer periods for other treatments, meaning your product can get to its final destination much quicker. Learn more—www.steritech.com.au
