

WHAT'S NEW

1

1. CAT SCRATCHING POSTS

Pet One Cat Scratching Posts are designed to satisfy your cat's natural scratching behaviour. Scratching Posts provides a suitable, stable place for cats to scratch, reducing the chance they will be attracted to your furniture and curtains!

Cats get great enjoyment from the sensation of scratching. Pet One Scratching Posts feature several textured materials that provide your cat with a range of feelings to enjoy.

2. REPTILE ONE YOUR FIRST HATCHLING KIT

The Reptile One Your First Hatchling Kit is the perfect versatile, glass starter terrarium for hatchlings or small reptiles.

The hatchling kit includes everything you need to house a hatchling or small reptiles. Each kit contains a hide log, corner dish, nano snake hook, multipurpose tongs and a 5-watt heat mat.

NEW WATER FLOW SENSOR

The Aquatronica Aquarium Control and Monitoring system has a new component – the water Flow Sensor. With the new water Flow Sensor available in 2400l/h, 5000l/h and 9000l/h flow capacities, the Aquatronica Touch Control and Black Box Control system can now keep track of water flow rates and water consumption. This allows the system for example, to alert the user to flow rate changes due to blockages or pump defects, or raise an alert for filter maintenance. Combined with the ability to connect the new Flow Sensor, once the Touch Controller / Black Box Controller has been updated to the latest free downloadable firmware, controlling the system via the internet is a breeze. Simply connect the Touch Controller or Black Box Controller via the inbuilt LAN/Ethernet port to the router or via the optional Wi-Fi key, to wirelessly connect the Touch Controller or Black Box Controller to the internet. The user can then view and control the system from anywhere with internet connectivity – no apps required! The system is compatible with PC, OSX, iOS and Android – any device with an internet browser!.
