

about Company of Animals

Our Story

Founded in 1979, Company of Animals is a hub of activity, research and innovation. We are constantly developing exciting products that work to resolve pet-related behaviour and training problems, improve animal welfare and enrich the lives of pets and their families. The products we create are shipped all over the world and stocked in thousands of independent pet shops, high street stores and online retailers. Animal welfare and happiness is at the root of everything we do. After all, when are we ever happier than in the company of animals...

Pioneering

At Company of Animals we have acquired over 40 years' experience in canine behaviour, animal science and product development and we continue to forge the way for pet care and training innovation. From our award-winning Halti® head collars and harnesses to household name Pet Head and our market-leading Baskerville muzzle we strive to create products that celebrate and support the happy lives of pets.

Personable

We have always worked to maintain an honest and open approach to pet ownership and the joy we all feel from being with our pet. We meet pet parents every day at the farm for consultations or classes providing the perfect base getting to know our customers and their day-to-day needs. Our products are designed for real people, real animals and real lives focussing on how training and everyday experiences can be made easier and more enjoyable without compromising your beloved pet's unique and fun personality.

Playful

There is never a dull moment on the Company of Animals farm and we wouldn't change it for the world. We understand how important it is to love what you do and have fun while you do it. We are dedicated to helping all animals and owners enjoy all aspects of life together whilst nurturing your one-of-a-kind furry friend. That's why we take delight and inspiration from consumers and their animals to create new and exciting products designed to champion the joy that comes from pet parenthood.

Passionate

It's been said that you should never work with children or animals. We say, that's wrong! Dr Roger and our team of experts have nurtured, improved and supported the lives of thousands of dogs and their families. It is our distinct belief that all pets and their owners should enjoy the best quality of life together. By creating high quality training and lifestyle products that deliver results we can help ensure that you can get the most out of your beloved pet.
